

## **NCS Training Services**

Network Centric Solutions is an Oracle Certified Advantage Partner, with leading-edge in-house technical capability and experience. Our training forte is skill transfer of specialised Oracle, Java and UML knowledge to clients, which we have been delivering for the past five years, with considerable success. Clients for whom we have run dedicated training courses during that time keep coming back to NCS for more.

It is an intrinsic part of the NCS service that when we are working with clients on projects, skill transfer takes place to build self sufficiency on the part of that client.

## **NCS Training Coverage**

<u><b>Course Content (Oracle)</b></u>

Introduction to XML (3 days)	XML and Oracle Development (3 days)
Introduction to LDAP and Oracle Internet Directory (2 days)	

### NCS Training Delivery

NCS Trainers are Consultants in their own right. All NCS Consultants are professionally certified. We have Oracle Certified Professionals, Sun Certified for Java professionals and Red Hat Linux Certified professionals. These professionals spend most of their time working on Client consultancy and support and aggregate this experience into the training they give.

When you choose Training from NCS you are choosing Training by fully experienced, 'hands-on' technicians who really have 'been there and done that'.

In addition to the real-time training experience with NCS, Clients also get comprehensive training manuals, not just copies of Powerpoint slides.

### NCS Training Clients

The following are some of the Clients that have chosen NCS Training:

<u>Clients</u>	
Morgan Grenfell Asset Management	Royal Bank of Canada
Energy Savings Trust	Foundation Systems
Card Protection Plan	Nisa Today's
Global Asset Management	United Grand Lodge of England
Chubb Insurance	Countryside Council of Wales
WS Atkins	People's Bank
